SKILLS

Languages

TypeScript · JavaScript · SQL · Python (basic) · GDScript

Frontend

React · Next.js · TanStack Start · TanStack Query / DB · Tailwind CSS · Mantine

Mobile & desktop

Expo · React Native · Electron

Backend & data

Supabase · Postgres · SQLite · PowerSync · Sanity CMS · Resend · Zod

AI

MCP servers · TanStack AI · Claude Code

Tooling

Git & GitHub · Bun · Vite · Vitest · Vercel

LANGUAGES

German native
English fluent (C1)

Open to full-time roles.
On-site, hybrid or remote.
Available immediately.

PROFILE

Self-taught full-stack developer. I take products from the data model to the deployed app on my own: offline-first sync, web, mobile and desktop clients, content that non-technical owners edit themselves, and hosting. Freelancing since 2024; since December 2025 I have been building my own product, Self-Engine. I work with AI coding tools every day and built an MCP server that lets AI assistants work with an app's data.

EXPERIENCE

Founder & sole developer
Dec 2025 – present

Self-Engine

- Offline-first productivity platform: time tracking, tasks, calendar, finances and habits on one data model, synced across web, macOS and iOS.
- Bun monorepo: TanStack Start web app, Expo / React Native mobile app and Electron desktop app sharing one domain layer (schemas, workflows, UI kit, i18n).
- MCP server through which AI assistants read and write projects, tasks, time entries and finances; in-app AI features via TanStack AI.
- 2,200+ commits, ~5,900 tests (Vitest), 50+ architecture decisions recorded as ADRs.

TypeScript · TanStack Start · React Native / Expo · Electron · SQLite · PowerSync · Supabase · Postgres · Clerk

Service staff (part-time)
Jun 2025 – Oct 2026

Dávid-Ristobar, Ottobeuren

Alongside freelancing: a steady income and time among people.

Freelance full-stack developer
2024–present

Self-employed

- **Endstation Tattoo:** studio website with artist portfolios and booking requests, which the studio edits itself in Sanity.
- Built in one monorepo with the sites of further tattoo studios and a portal for their booking requests; each site has its own CMS project and deployment.
- **KaWAna:** website for women's circles and cooking classes, with sign-up forms and a CMS.

TanStack Start · Sanity · Supabase · Resend · Vercel

Customer service
2016–2020

Ticket-Center Hohenschwangau (Neuschwanstein)

Ticket sales and visitor service for Neuschwanstein Castle, interrupted by two semesters of mechanical engineering. Winters spent travelling.

SIDE PROJECTS

gwydion.dev 2026
Bilingual, server-rendered portfolio: TanStack Start, Tailwind CSS, Lingui, MDX.

Burgwacht 2026
Castle-building strategy game in Godot 4 (GDScript), built solo; 400+ commits.

Work Manager 2025
Work and time management app with Next.js, Mantine and Supabase; predecessor of Self-Engine.

EDUCATION

Wood engineering studies (5 semesters, no degree) 2021–2024
Hochschule für nachhaltige Entwicklung Eberswalde

Mechanical engineering studies (2 semesters, no degree) 2017–2018
Hochschule Kempten

Advanced technical college entrance qualification (Fachabitur), business 2014 – Jul 2016
FOS Kempten

Online courses in software development (Udemy, Zero To Mastery).
