SKILLS

Languages
TypeScript · JavaScript · SQL · Python (basic) · GDScript

Frontend
React · Next.js · TanStack Start · TanStack Query / DB · Mantine · Tailwind CSS

Mobile & desktop
Expo · React Native · Electron

Backend & data
Supabase · Postgres · PowerSync · PGlite · Sanity CMS · Resend · Zod

AI
MCP servers · TanStack AI · Claude Code

Tooling
Git & GitHub · Bun · Vite · Vitest · Vercel

Remote, any time zone.
Available immediately.

PROFILE

Self-taught full-stack developer with three years of intensive, hands-on building. I take products from data model to deployed app on my own: offline-first sync, web, mobile and desktop clients, CMS setups that non-technical owners can edit, and hosting. I work daily with AI coding tools and have built an MCP server that lets AI assistants work with an app's data.

PROJECTS

Self-Engine
Dec 2025 – present

Creator · offline-first productivity platform for self-employed people

- Time tracking, finances, calendar and habits in one product, with web, iOS/Android and desktop apps that work offline and sync across devices.
- Bun monorepo: TanStack Start web app, Expo / React Native mobile app and Electron desktop app sharing one domain layer (schemas, workflows, UI kit, i18n).
- Built an MCP server so AI assistants can read and write projects, tasks, time entries and finances; in-app AI features via TanStack AI.
- Architecture decisions documented as ADRs, tested with Vitest, 2,200+ commits.

TanStack Start · Expo · Electron · Supabase · PowerSync · PGlite · MCP

Websites for small businesses
2025 – present

Independent web developer (pro bono) · design and build

- **Endstation Tattoo:** relaunch of the studio's website, going live in November 2026. Built in a monorepo together with sites for further tattoo studios; each site has its own CMS project and deployment.
- **KaWAna:** redesign proposal for a friend's site offering women's circles, cooking classes and 1:1 sessions, with contact and registration forms.
- Built so owners can edit their content themselves in Sanity Studio.

TanStack Start · Mantine · Sanity · Resend · Vercel

gwydion.dev
2026

Portfolio site with TanStack Start, Mantine, Paraglide (i18n) and Vitest.

Burgwacht
2026

Castle-building strategy game in Godot 4, built solo (400+ commits).

Work Manager
2025

Work and time management app with Next.js, Mantine and Supabase; predecessor of Self-Engine.

EDUCATION

Fachabitur
German advanced technical college entrance qualification

LANGUAGES

German native
English fluent (C1)
